

CONVENTION ON INTERNATIONAL TRADE IN ENDANGERED SPECIES
OF WILD FAUNA AND FLORA

Twenty-sixth meeting of the Animals Committee
Geneva (Switzerland), 15-20 March 2012 and Dublin (Ireland), 22-24 March 2012

PERIODIC REVIEW OF ANIMAL SPECIES INCLUDED IN THE CITES APPENDICES

The attached information document has been submitted by the Secretariat at the request of UNEP-WCMC in relation to agenda item 13.

The geographical designations employed in this document do not imply the expression of any opinion whatsoever on the part of the CITES Secretariat or the United Nations Environment Programme concerning the legal status of any country, territory, or area, or concerning the delimitation of its frontiers or boundaries. The responsibility for the contents of the document rests exclusively with its author.

Species within Annex 1 of AC25 Doc. 9.6. that are categorised as Critically Endangered (CR) or Endangered (EN) within the IUCN Red List

Resolution Conf. 14.8 and its Annex provide guidelines for the selection of species for the periodic review, outlining four outputs that should be produced as an initial phase of this process.

In preparation for the 25th meeting of the Animals Committee (Geneva, July 2011), the Secretariat requested UNEP-WCMC to produce a series of outputs, based on the guidelines provided within Resolution Conf. 14.8 and its accompanying Annex. On this basis, UNEP-WCMC prepared Outputs 1, 3 and 4 for consideration by the Animals Committee (AC25 Doc. 15.6 and its Annexes). In addition, Output 2, which refers to Appendix II listed species that are in trade, was presented in the form of a preliminary assessment of all those species for the first step in the Review of Significant Trade (AC25 Doc. 9.6).

In order to complete the work related to Output 2 and in accordance with Resolution Conf. 14.8, UNEP-WCMC offered to produce for AC26 a list of Appendix-II species within Annex 1 of AC25 Doc. 9.6. that were categorised by IUCN as “EN” (Endangered) or “CR” (Critically Endangered) to enable the Committee to make recommendations, as appropriate, for evaluating whether these species warranted a review. This is presented in the table below.

Order	Family	Taxon	IUCN RL
PHYLUM CHORDATA			
CLASS MAMMALIA			
Artiodactyla	Bovidae	<i>Saiga tatarica</i>	CR
Carnivora	Felidae	<i>Prionailurus viverrinus</i>	EN
